## Feedback

### How would you rate the service?

said excellent, very good or good

found the online booking system easy

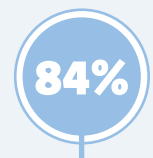

would recommend it to a friend

said it would encourage them to remain in the ASTI Salary Protection Scheme

of females said they were more confident on how to self-check after the assessment

of males said they knew more about prostate health after the assessment

# What members had to say...

All appointments were within days so no time spent worrying.

I'd never had a breast check and this was completely hassle-free and easier than I had anticipated.

All medical personnel that I dealt with were very understanding & put my mind at ease.

The referral was very prompt. The treatment in Beaumont included a biopsy as I posed a medium risk. This was all included in the service. Thankfully, I got the all clear. The whole experience was invaluable.

Very fast, friendly and efficient.

It really alerted me to signs I had missed and reminded me to self-check more often.

An excellent initiative - so impressed with each stage of the service.

I definitely feel more confident in doing my own checks. Although, after being referred for further examinations, the reassurance I feel that there is nothing there, or that if there had been something it would have been caught, is huge.

I would not have started getting mammograms for another 5 years and was completely unaware that the 40 to 50 age group was a particularly dangerous zone for breast cancer.

The service was excellent - reassuring, friendly and convenient.

Excellent opportunity to focus on an area we all neglect.

When I got the email I felt it was imperative to participate.

Offers peace of mind.

Doctor was very pleasant and the visit was completed in a punctual and quick manner. Especially as one might be apprehensive when getting the check-up.

I had 3 tests performed. It was great the results were emailed to me.
